Introducing

the newest innovation and

INDUSTRY LEADER.

Bestbale™

Pro 710 *Series*

The world's highest performing small square baler control system.

Modernize your small square hay baler with a revolutionary Bestbale™ *Pro* technology kit featuring:

- In-cab display
- Strokes per minute
- Flakes per bale
- Bales per field
- Pressure control (*Auto & Manual*)
- Bale scale
- Knotter lubrication kit
- Camera
- LED knotter light kit
- Remote baler data monitoring
- Remote baler control
- Wireless software updates

Pressure Control

Manual Mode: Adjust the baler pressure from the tractor seat with the push of a button. Set your desired operating pressure and monitor the weights instantly. Change the pressure on the fly!

Auto Mode: Simply set your target weight and the system adjusts automatically to keep the bales at your target weight. Very easy to operate!

Maximize Efficiency

Ideal strokes per bale = **Optimized operator speed**

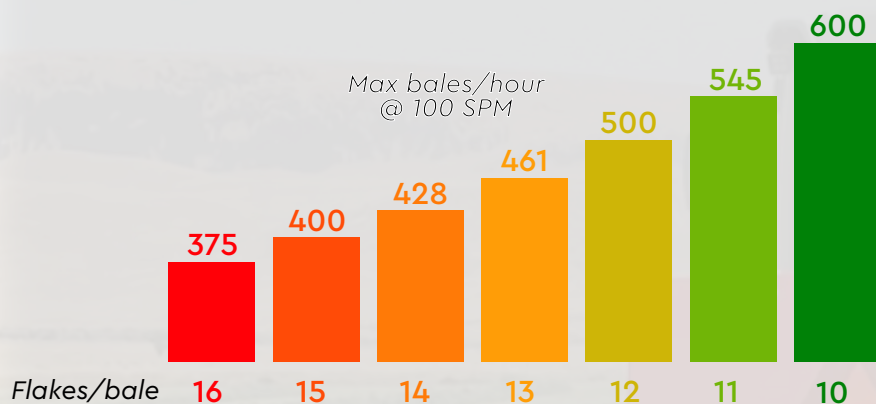

Consistent flake counts = **Dependable bale quality**

Full operator control = **Enhanced baling window productivity**

On-target bale weights = **Superb bale yields & first-class customer experience**

Monitoring flakes/bale increases operator efficiency significantly. Most inexperienced operators are 40% more efficient with the Bestbale™ system.

Speeding up from 14 flakes per bale to 10 flakes per bale = 40% increase in production

"The BestBale™ Pro 710 scale kit is so simple and does such a great job. To this day, I am still obsessed with it as it is my most favorite piece of equipment to run on the farm. My bale quality is extremely good, it keeps my costs low, and helps me make the best possible bale I can. It has already paid for itself twice in two and a half cuttings."

- Ty Wilcox, Washington

100% Satisfaction Guarantee

Pro Scales

- ⌘ ~85% of bale weights are within 2 lbs accuracy*
- ⌘ See individual bale weights and 8 bale average
- ⌘ View and zero live weights in the cab or at the scale box on the baler
- ⌘ Fully adjustable shock positions for various bale weights
- ⌘ Adjustable scale platform tailors itself to your application
- ⌘ Flat drop scale accomodates 30-40" bales
- ⌘ ¼ turn scale accomodates 30-50" bales
- ⌘ Trail Bale Baron scale accomodates 30-36" bales

**Premium powder coating finish and
304 stainless steel wear parts
for superior durability.**

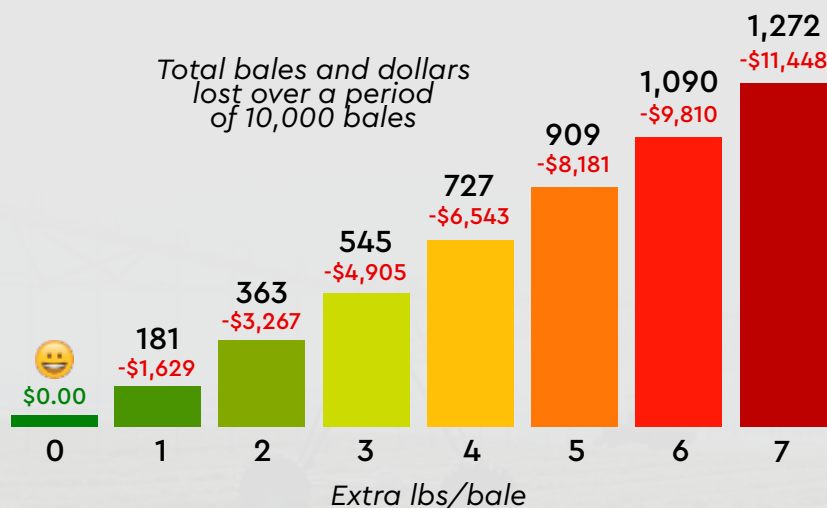

*Varying ground conditions and operating speeds will directly affect the system's performance.

It pays to own the IBest

When you sell hay by the bale, it is crucial to hit the correct weight.
Adding just a few pounds to each bale is a costly mistake!

(Numbers based on a target bale weight of 55 lbs at \$9.00/bale)

BestBale™ customers enjoy the benefit of precise bale weights from experienced and inexperienced operators alike, ensuring bale weights are accurate and consistent for your customers' needs. Consider a feature like Auto Mode, where you simply set your desired bale weight, and the BestBale™ Pro system will automatically control your baler's pressure in order to keep your weights consistent from dusk until dawn. It's a dream for both owners and operators!

Add on Options

Pro Lubrication

KL50 shown

- 💧 Receives No. 2 grease or oil.
*Grease recommended
- 💧 Large 3L capacity.
- 💧 User controlled lubing intervals.
- 💧 Lubes all 12 knotter zerks.
- 💧 Each zerk receives the same amount of grease every cycle.

Pro Lights

- 💡 Magnetizes to knotter hood.
- 💡 Easy to install and move.
- 💡 Plugs directly into harness.

GAZEEKA

by Samuel Jackson

- Pro Series kits are fully compatible with the Gazeeka 180 system.
- Mount your Gazeeka onto the BestBale™ scale.
- Plug your Gazeeka into the BestBale™ wire harness.
- Display moisture readings and adjust settings from the BestBale™ monitor, completely eliminating the need for the Gazeeka monitor.
- Displays the Instant, Average, and Peak readings.

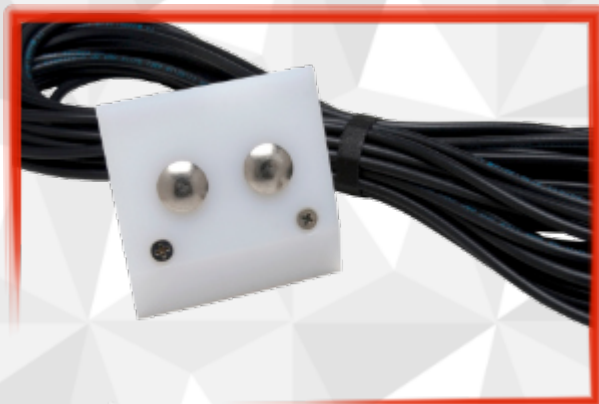

GZK180i shown

Delmhorst®

INSTRUMENT CO

DH1986 shown

- Pro Series kits are fully compatible with Delmhorst 1986 moisture pads.
- Plug the pads into our Pro 710 or Lite 430 kit to get access to the moisture readings on the BestBale™ monitor.
- Use 1 or 2 pads
- Displays left, right and average moisture readings

Pro Series kits are compatible with steamer units and multiple baler hitches with an extension harness purchased from BestBale™. Scales are also available for T Model Bale Barons.

Introducing Wireless Control

available on Pro series models

WIFI Remote Monitoring & Control

- Monitor bale production, strokes/min, previous flake counts, and bale weights.
- Adjust baler pressure and other settings remotely from a separate monitor.
- Up to 300' operating range.
- Ideal for crew managers who are in the same field with multiple balers running.
- Ideal for rebale setups to give control to someone in a nearby loader.
- One time upfront cost, no recurring fees.

KT50 and Q500 shown

CS510 and F500 shown

LTE Remote Monitoring

- Monitor bale production, strokes/min, previous flake counts, and bale weights from afar.
- Watch baler pressure and other settings remotely from a separate monitor or computer.
- Ideal for crew managers who are in different fields or farms.
- Ideal for customers who want more flexibility.
- Gain access to remote software updates.
- Requires cell phone service and yearly data plan to operate.

Quality. Durability. Reliability.

Lite 430

Premium quality. Affordable price.

www.bestbaleusa.com

- Monitor strokes per minute to ensure you're running the optimum tractor RPM.
- Observe your strokes per bale to maintain proper ground speed.
- Always have a total bale count when you leave the field.
- NEW! Compatible with a scale assembly.
(Does not offer pressure adjustment or AUTO mode)
- NEW! Moisture pad compatible.
- Robust sensors count strokes and tie cycle 1:1.
- Rugged IP67 rated display with RAM mounts.
- Easy to install!

Delmhorst®
INSTRUMENT CO

DH1986 shown

Lite Series kits are designed for the operator who wants critical information in a simple package. While it **does not** offer pressure control, it does allow the operator to manage PTO settings and ground speed by observing stroke, flake, and bale counts.

Lite Series kits also allow the integration of our industry leading scale kit, giving the operator full visibility of bale weights.

Lite Series kits are compatible with DH2110 moisture pads.

New Holland

Lite Series Models Available

<u>Massey Ferguson</u>	<u>New Holland</u>	<u>John Deere</u>	<u>All Others</u>
1838	570	328	All T Model Bale Barons are compatible with scales. Most Hesston balers can be readily outfitted with Lite Series kits. Case balers that are similar to NH or MF can be readily outfitted. Freeman balers can be outfitted but may require a custom wire harness and mounting brackets. We should be able to outfit your baler even if it isn't listed here. For those balers not listed, it is because we do not have a wire harness and/or mounting brackets for them. Please contact us via our website, bestbaleusa.com for all other inquiries and let us confirm availability.

Frequently Asked Questions

Q: I have an older baler with manual tension but plan to upgrade to a new baler with hydraulic tension, will the Pro kit work on my existing baler?

A: Yes it will. You can operate the baler now without installing the hydraulic valve and transducer, then when you get your new baler, simply install those components. Each model of baler has a unique wiring harness and mounting brackets, so you will need to purchase those when you make the switch.

Q: Are these kits interchangeable on different makes and models of balers?

A: While the main components will work on any baler, like the screen, sensors, and scale, the brackets and wiring harnesses are not interchangeable. So if you want to move your kit to a new make or model of baler, you will need to purchase a new wiring harness and new mounting brackets for most of the components. The main scale framework should work on any baler as long as it is the same size (14×18 to a 14×18. A 16×18 scale will not work on a 14×18 baler and visa versa).

Q: If I get the quarter turn chute, can I still drop bales flat if I want?

A: It depends on the length of bale. Our quarter turn scale kits will turn any length of bale on its side, but will only drop a 42–52" bale flat. If you want to drop a bale flat that is shorter than that, we recommend purchasing the flat drop scale kit.

Q: What if I purchase the Lite kit now but plan to upgrade to the Pro kit later, will I be able to reuse parts of the kit?

A: There are enough different components (screen and RAM mounts, cab and baler harness, and baler mounted ECU) that it would be more efficient to either move the Lite kit to a different baler or sell it altogether and replace it with the Pro kit. The main exception would be with the scale kit as it is the same for both series and would accept the upgrade seamlessly.

Q: My baler isn't listed as compatible, what are my options?

A: The main components of our kits are compatible with any baler, however the mounting brackets and wiring harness will vary greatly. We are happy to work with you to develop a kit for your baler, please contact us to get started.
